4 Players

13+ years

Competitive

e

Card Drafting

As decks are passed around, players will simultaneously make quick and compounding decisions about which policies, resources or stage bonuses to obtain.

Learning Goal

Build a better understanding of the concepts and dynamics of election campaigns through engaged and strategic play.

Contents of Game

| | |
|---------------------------------|---|
| Stage Bonus Board & Tiles | Obtain fun and useful advantages from powerful support groups |
| 6 Unique Player Character Tiles | Choose a candidate that electrifies you! |
| Processing Power Tokens (PP) | Collect and spend resources to claim policies |
| Fundraising Bonus Tokens (4) | Accumulate bonuses for having the most cash |
| 4 Stage decks | Construct the best platform, one policy at a time |
| 1 Event deck | Hope for the best as you brace for the worst during your campaign |

Reference Cards: Use these to easily and conveniently reference game actions, symbols and scoring

How to Play

01

**Choose a
Candidate and
Set-up the Board**

02

**Shuffle and
Deal Cards**

03

**Claim Resources,
Policies, and
Bonuses**

04

**Gain the
most votes
and win!**

_ □ ×

01

_ □ ×

.....

Choose one of 6 potential Mechamerica candidates and receive all corresponding character tiles.

▶▶▶▶

Place the Stage Bonus Board & Tiles in the center of play and set aside all tokens and card decks

02

Starting with the **Stage I: Exploratory Committee** deck, deal 6 cards to each of 4 player.

Each players picks a card to keep and all players reveal their chosen cards simultaneously.

The card actions are resolved then each hand is passed clockwise to the adjacent player. (next stage rotation changes to counter-clockwise)

03

»»»» When drafting, as an action you can...

- ★ claim a Processing Power or Policy Card card to build your resources.
- ★ discard a card and gain some Processing Power
- ★ claim a stage bonus, if you control the required amount of policies for that interest group. This comes at the cost of a card from your hand and the required PP.

-You may NOT claim Stage bonuses out of order!

-The last card drafted per round must be discarded for PP.

**3
PROCESSING
POWER**

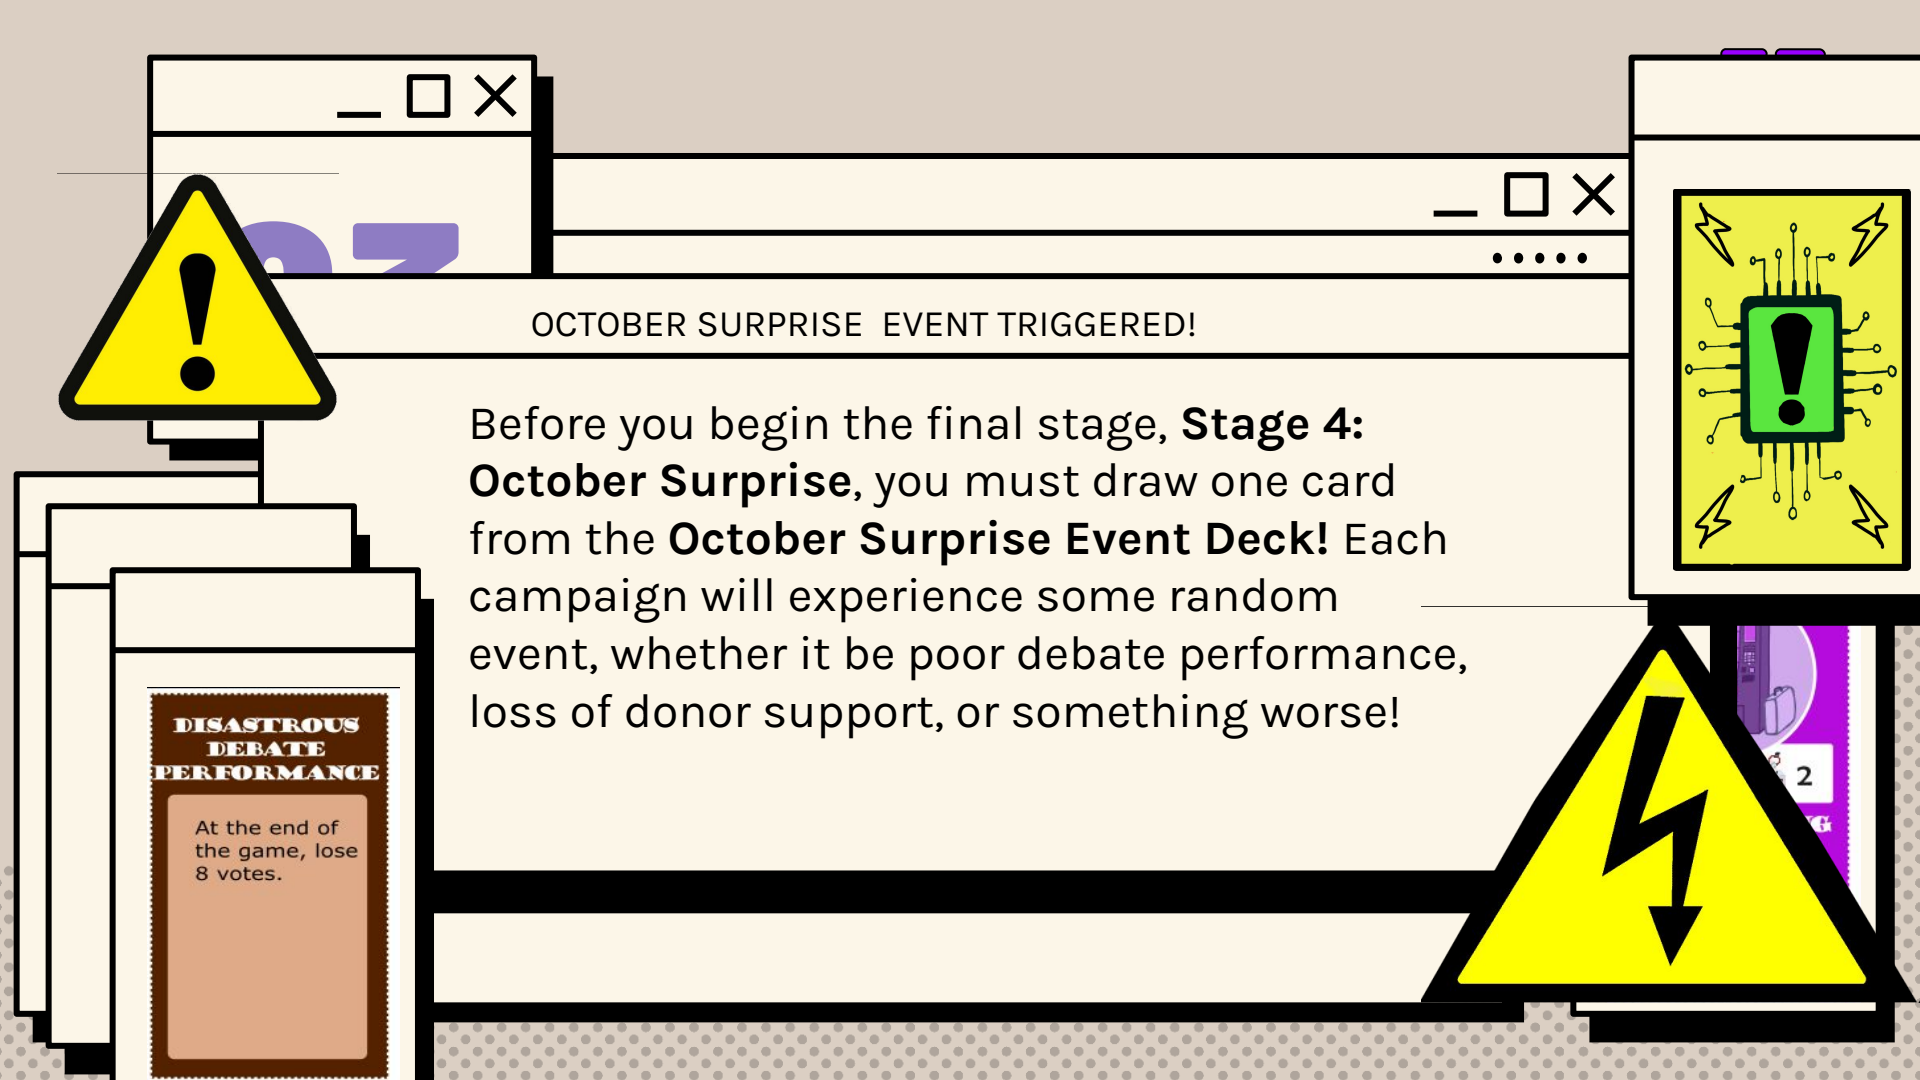

"I don't care too
much for money."
- The Beatles

☀️ 3 📱 2

**BASE VENDING
PP INCREASE**

Who doesn't love
a raise?

OCTOBER SURPRISE EVENT TRIGGERED!

Before you begin the final stage, **Stage 4: October Surprise**, you must draw one card from the **October Surprise Event Deck**! Each campaign will experience some random event, whether it be poor debate performance, loss of donor support, or something worse!

**DISASTROUS
DEBATE
PERFORMANCE**

At the end of
the game, lose
8 votes.

04

At every end of stage/round the player with the most PP receives a Fundraiser Token.

At the end of the Final stage it's time to tally the votes! Votes are tallied from policies claimed, Fundraiser Tokens collected, and/or Stage Bonuses gained. (don't forget to resolve any active October Surprise Events)

NEWS

The candidate with the most votes becomes the winner and President of Mechamerica!

Retiring from the Campaign: At any time (before tally) you may drop out of the race and **Endorse** another player by giving them one of your policies and discarding all cards and tokens you control.

Learning Potential

.....

**Teaching Flow of
Election Process
and Stages**

**Reinforcing and
reinterpreting
previously learned
material**

**Engaging in
campaign strategies
and dynamics**

**Discussing
Importance of
Civic engagement**

**Understanding Election
concepts such as
Fundraising, Resources
Management and Policy
Making**

**Learning Role of
various entities like
Interest Groups and
Opposing Candidates**

Learning through Gaming

Fun and engaging art and game pieces, light-hearted abstraction of real-world themes

Election themed Card titles, flavor text, rule text, round Stages

Aesthetic

Mechanic

Theme

Play

Role-play as a candidate by claiming Policies, spending Resources, simultaneous drafting,

Quick and compounding decision making, competitive strategizing, emotional engagement,

Developing and Testing the Game

While the game began as a simple idea (robots running elections), the design process was anything but simple.

.....

Three main elements to design:

- The Board of Bonuses
- The Cards
- The October Surprise Events

Unique Challenges and balance considerations for each

Design Considerations

The Board

16 Available Bonuses

Spread among four paths

Each path is reflective of the priorities of an interest group while providing a unique style of gameplay.

The Cards

41 Distinct Cards

Each with their own cost, worth, flavor text, titles, and distribution.

Needed to be interesting and well-distributed enough to be engaging

The Events

7 Random Events

Needed to reflect real challenges campaigns face.

Need to be impactful without being too devastating.

| | | | | | |
|--------------------|-----|-----|-----|----|---|
| Stage I | | 2.5 | 1.5 | 24 | |
| 1 Processing Power | N/A | 0 | 0 | 7 | "It's the economy, stupid." - James Carville |
| 2 Processing Power | N/A | 0 | 0 | 5 | "Money makes money. Must be funny. In the rich man's world." - ABBA |

| STAGE BONUSES | | | | | |
|--|--|--|--|---|---|
| Industrial Machinery | Office Automata | Capitalism | Legacy Models | COST and REQUIREMENTS | |
| Ribbon Cutting Ceremonies: | Consistent Donor Base: | All Donor Support: | Grassroots Volunteers: | | |
| At the end of the game, you can choose any one card to score twice. | Permanently gain 1 PP for each campaign stage that has passed (i.e. in stage three you would have 2 permanent PP). | The first PP card played in any subsequent stage of the campaign is worth twice as much. | If you gain a fundraiser bonus token, the next policy you construct costs only 2 PP. | 2 PP, at least one policy for the relevant group. | |
| Factory Union Endorsement: | Chamber of Commerce Endorsement: | Culinary Union Endorsement: | Former President's Endorsement: | | |
| Building Duplicates of any Industrial Machinery Policy is Free. | Spend 2 PP to activate Office Automata Policies. | Instantly construct one previously discarded policy or board. | At the end of the game, give one additional vote for every Legacy Model policy you've constructed. | 3 PP, at least two policies for the relevant group. | |
| Campaign Material Production Contract: | Voter Outreach Software Development: | New Media Tour: | Evenly Distributed Base: | | |
| Instantly Gain 3 PP for each Industrial Machinery policy you have constructed. | Gain one vote for every 3 PP you have left over at the end of the game. | Instantly Gain 3 PP for each Hospitaliton policy you have constructed. | Interest Groups' stage bonuses require one less policy to claim. | 5 PP, at least three policies for the relevant group. | |
| Factory Floor Turnout Operation: | Advanced Advertising Campaign: | Populist Movement: | Strong Support Turnout: | | |
| If you and your opponent have constructed the same policy, they receive two-thirds of the votes from that policy, rounded down. Policies cannot be worth less than one vote. | At the end of the game, gain 3 votes for each fundraiser bonus token you have. If you have rounded down. | Gain two votes. At the end of the game, for every two Hospitaliton policies you have constructed, multiply the two votes by two. (For example, constructing 8 Hospitaliton policies will earn you 64 votes (2 x (2 x 2 x 2 x 2))). | Double the number of legacy model policies. | 7 PP, at least five policies for the relevant group | |
| In-Home Repair Services | Legacy Models | 9 | 7 | 1 | This will make it as easy possible for those in need of repairs to get them. |
| Publicly Supported Pensions | Legacy Models | 10 | 8 | 1 | Robots beyond their prime will be able to retire with dignity and spin their dials in peace. |
| Build New Sleep-Cycle Pods | Hospitalitons | 7 | 6 | 2 | Sleep-Cycle pods for Hospitalitons are expensive, but increasing the supply might bring down the price. |
| Lower Wholesale Food Prices | Hospitalitons | 9 | 7 | 1 | What's a robot's favorite snack? Computer chips! |
| Guaranteed Paid Malware Leave | Hospitalitons | 10 | 8 | 1 | Even computers get viruses. |
